

Ssu-Yuan Lin (Blake)

AI Software Engineer

ssu.yuan.lin@gmail.com

I build ML pipelines, computer-vision software, and hardware-integrated systems. My recent personal projects explore traceable AI research reading and user-controlled speech-to-text.
3+ years of professional engineering · M.S. in Physics

Professional experience

DynaSafe Corp. · Senior AI Engineer 2026-01 – 2026-04

Profiled a dataloader bottleneck and rebuilt the training data pipeline. **10x model-training speed.**

Built and adapted a Nvidia Morpheus network-anomaly workflow using real PCAP input. Ran and adapted PhysicsNeMo training workflows for an OpenFOAM CFD use case.

MetGauge Co., Ltd. · Software Engineer 2023-09 – 2024-08

Led system design, hardware integration, and boundary testing for a 12-stereo-camera line. **MVP → factory-ready production testing.**

Defined test specifications and analyzed results to guide cross-functional hardware tuning.

UTECHZONE Corp. · Algorithm Engineer 2021-06 – 2022-03

Developed C# automated optical inspection algorithms for manufacturing lines. **40% lower AOI cycle time.**

Mentored two engineers and worked with a cross-functional team of 10+ on integration milestones.

LIPS Corporation · Software Engineer, Algorithm Development 2019-07 – 2020-04

Improved real-time stereo-camera 3D measurement through calibration and algorithm redesign. **66% improvement in measurement accuracy.**

Calibrated Intel RealSense D415/D435 camera systems.

Professional metrics are reported in the career record; original measurement protocols are not included.

Recent personal projects

Study Atlas

Built bilingual research-reading routes with traceable sources, explicit inference boundaries and calculated delivery-budget checks. A preserved study provides inspectable reader cards and a historical rejection-to-revision walkthrough.

Transcribe-for-X

Built an Android speech-to-text prototype that verifies saved audio before local recognition, preserves the original transcript and applies only user-approved removals. Device and mixed-language quality remain to be tested.

Selected skills

Python · C++ · C# · ML pipelines · Computer vision
Profiling · Stereo-camera calibration · Hardware integration · Test design

Education & research

M.S. in Physics · National Central University · 2016 – 2018

B.S. in Physics · National Central University · 2012 – 2016

Research Assistant · National Central University · 2018-09 – 2019-01

Local review candidate · 2026-10-05
