

Ssu-Yuan Lin (Blake)

AI Software Engineer

ssu.yuan.lin@gmail.com

Software engineer with 3+ years of experience in ML training, computer vision and hardware integration. Recent personal work includes a bilingual research reader and an Android app for turning recordings into editable text.

Professional experience

DynaSafe Corp. · Senior AI Engineer 2026-01 – 2026-04

- Rebuilt the training-data pipeline after profiling a dataloader bottleneck, making model training 10× faster.
- Adapted Nvidia Morpheus for network-anomaly detection with real PCAP data, and PhysicsNeMo training for an OpenFOAM CFD use case.

MetGauge Co., Ltd. · Software Engineer 2023-09 – 2024-08

- Took a C++/Python 3D-measurement prototype to factory-ready production testing on a line with 12 stereo-camera pairs.
- Led system design, hardware integration and boundary testing; used test results to guide hardware tuning.

UTECHZONE Corp. · Algorithm Engineer 2021-06 – 2022-03

- Developed C# optical-inspection algorithms that reduced AOI cycle time by 40%.
- Mentored two engineers and worked with a cross-functional team of 10+ on system integration.

LIPS Corporation · Software Engineer, Algorithm Development 2019-07 – 2020-04

- Improved real-time 3D measurement accuracy by 66% through algorithm redesign and calibration of Intel RealSense D415/D435 stereo-camera systems.

Personal projects

Study Atlas

Built a reader that turns research into English and Traditional Chinese cards, with short and in-depth reading routes. Added checks that reject an over-budget reading plan before delivery.

Transcribe-for-X

Built an Android prototype that saves audio before running local speech recognition. Kept the original transcript separate from cleanup suggestions, so users can accept or reject each removal.

Technical skills

Python · C++ · C# · ML pipelines · Computer vision

Profiling · Stereo-camera calibration · Hardware integration · Test design

Education & earlier research

M.S. in Physics · National Central University · 2016 – 2018

B.S. in Physics · National Central University · 2012 – 2016

Research Assistant · National Central University · 2018-09 – 2019-01
